

**EDWIN GLASS, M.D.**  
**Nuclear Medicine**  
**Medical Imaging Center of Southern California**

Edwin Glass, M.D. is a renowned Nuclear Medicine Physician who has been working in the surrounding LA community for over 25 years. He has been a part of our Medical Imaging team for three years. He is currently on staff at St. John's and is the Section Chief of Nuclear Medicine at the Veterans Administration Hospital, Greater Los Angeles Healthcare System. Dr. Glass is also a faculty member at UC Davis and UCLA

Dr. Glass graduated Magna Cum Laude and Phi Beta Kappa with a mathematics degree from the University of Texas. He received his Medical Degree from Baylor College of Medicine and went on to complete a residency in Internal Medicine at Kaiser Permanente Foundation Hospital - Santa Clara. He then completed a residency in Nuclear Medicine at University of California - Davis and was trained in MRI at Duke University.

Dr. Glass is Board Certified in Internal Medicine, Nuclear Medicine, Nuclear Cardiology, and Numerical Analysis. He has published countless articles many of them focusing on his cardiology and oncology research topics. Dr. Glass has lectured all over the world and routinely presents and acts as a moderator at the Society for Nuclear Medicine Annual Meeting.

Dr. Glass's expertise in Cardiac Nuclear Medicine in collaboration with Dr. Jabour's pioneering advances in CT coronary angiography has recently won them national recognition for the findings in the current diagnosis and management of coronary artery disease. Dr. Glass is also involved in researching lymphoscintigraphy with the Medical Imaging team.

Dr. Glass resides in the West Los Angeles area and is an active member of the Southern California Violin Makers Association and is also an avid participant in the Southern California and Western United States Folk Music Community.
